Real Help, Every Day

Manage, Monitor, Monetize

Headquartered in Richmond, BC, Plugzio is a proudly Canadian-owned cleantech company delivering smart EV charging and power management solutions ranging from Level 1, Level 2 and Level 3 OCPP compliant EV chargers to multifamily and commercial properties across the country.

Since 2019, we've helped property owners and managers get EV-ready and future-proof their buildings with scalable, cost-efficient charging solutions.

With real-time energy monitoring, easy installation, regulatory guidance, and proven expertise in unlocking EV incentives, Plugzio makes it simple to implement and expand EV charging infrastructure.

Affordable, Scalable EV Charging

Cost-efficient, easy-to-install EV hardware and software solutions that work for every budget.

Choose from a range of products and subscription options that fit your budget, infrastructure, network and panel capacity.

Keep 100% of EV Charging Profits

Start earning from every plug. Drivers pay for EV charging via QR code, using a reloadable wallet.

Simply set your charging rates and watch 100% of earnings go straight to your property.

End-to-End Support

Plugzio's project managers make it easy—guiding you from site assessment to installation while keeping power needs and budget in check.
