Manage, Monitor, Monetize

Plugzio is a cleantech startup specializing in delivering smart EV charging and power management solutions ranging from Level 1, Level 2 and Level 3 OCPP compliant EV chargers, and submetering solutions for multifamily and commercial properties across the Americas, Europe, and Asia-Pacific.

Since 2019, Plugzio has helped property owners and managers get EV-ready and future-proof their buildings.

From real-time energy monitoring and seamless installation support to regulatory compliance and rebate access, Plugzio makes it easy to install and scale your EV charging infrastructure.

Affordable, Scalable EV Charging

Cost-efficient, easy-to-install EV hardware and software solutions that work for every budget.

Choose from a range of products and subscription options that fit your budget, infrastructure, network and panel capacity.

Keep 100% of EV Charging Profits

Start earning from every plug. Drivers pay for EV charging via QR code, using a reloadable wallet.

Simply set your charging rates and watch 100% of earnings go straight to your property.

End-to-End Support

Plugzio's project managers make it easy—guiding you from site assessment to installation while keeping power needs and budget in check.
